Our Hands Tied.

It is admitted at the State Department, however, that the hands of this government are practically tied as far as the Mexican situation is concerned. While the declared purposes of Gen. This is not even the first occasion when Gen. Orosco has been notified that he must afford protection to Americans. It is admitted here that should the robels disregard demands made by this government, there is nothing which can be done to punish them.

The Division of Investigations of the Department of Justice has filed with the office of the United States Attorney a formal report of the forgeries and em-

This fact was announced last night by one of the officials of the division. It is a practice of the department to investigate all pseculations in connection with national banks. Consequently, when it was learned that forgeries to the extent of nearly \$25,000 had been committed at the Commercial Bank, an investigation was instituted at once.

The facts in the case were obtained with all the details, and were submitted to the United States Attorney's office. This was some time and, price is the heating of publicity in connected the affair. The superiment of Justice lineage to 40 at present.

prosecution of the young clerk is under
serious consideration. He would not distmated that action will be taken sooner

Even though an agreeable settlement
should be reached between the bonding
companies, which went the surrety of

There is no desire on the part of the bank officials or the bonding company officials, as far as is known, to prosecute the young teller, but the United States Attorney's office is of the belief that wrongdoing should be punished regard less of whether after exposure of guill restitution is or is not made.

The banker and broker whose business house is said to have executed orders on the New York Exchange for the young man is still out of the city. He is expected to return to-day. Rumors are to the effect that the broker at the time of the peculations was a director of the National City Bank, at which the teller was employed.
